Stop Fuel Theft!
Prevent Skimming, Siphoning, Spiking & Drilling

With Truckminder’s leading electronic anti-siphon device – TM3

TruckMinder are proud to announce the development of TM3 to prevent fuel theft.

Developed in conjunction with the haulage and fleet industry the electronic anti-siphon device helps protect a vehicle’s fuel load at all times.

TruckMinder have collaborated with leading telematics companies, so the device communicates and registers any attacks, providing key information to fleet managers and owners.

Key Features:
- TM3 protects the entire tank and fuel load
- The device connects to a vehicle's telematics system, allowing it to communicate and register any attempts at skimming, siphoning, spiking and drilling
- It protects the fuel cap, silently registering removal outside of any dedicated geo-fenced ‘safe’ zone
- GSM text and email alerts to fleet managers and owners for real time attacks, improving response times
- Protects more than just fuel - add additional sensors to protect the vehicles DPF and any additional tanks
- Cost effective, through one off payment or lease agreements

Partnership:
TruckMinder are a proud .connect registered partner with WEBFLEET TomTom TELEMATICS.

To arrange a demonstration of this exciting new electronic anti-siphon device please contact Ian Lester via ian.lester@truckminder.com or on 07790 020 527.

TM3 is an exciting extension of our product offering, for further details please refer to back page.

Suitable for 12V and 24V battery vehicles
Part No. 40641

- Main control unit for up to 3 sensor connections
- Exhaust sensor: 6m screened military spec cable
- Battery backed up siren
- Power supply lead
- Internal back up battery
- Service switch
- 2 x window warning stickers
- External vehicle batteries automatically protected from theft

Additional options for TM1
- Anti theft Fuel tank sensor
- Anti theft ECU unit Sensor
- GSM autodialling module that can text up to 3 phones
- Integration into existing telematics

Suitable for 12V Vans/Cars/Pickups/4x4s/Motorhomes
Part No. 40642

- Main control unit
- Exhaust sensor: 4m screened military spec cable
- Battery backed up siren
- Power supply lead
- Bonnet Switch
- 2 x Jubilee Clips
- 2 x window warning stickers

Suitable for 12V and 24V battery vehicles
Part No. 40652

- Electronic anti-siphon device
- Main control unit for up to 3 sensors
- Screened military spec cable
- Battery backed up siren
- Power supply lead
- Internal back up battery
- Fuel tank sticker
- External vehicle batteries automatically protected
- Connects with existing telematics

Additional options for TM3
- Anti theft Fuel tank sensor for 2nd fuel tank
- Anti theft Cat/DPF sensor

Opportunistic Theft Deterrents
Certificate No
TM1 TQA379
TM2 TQA380
